

# The 1776 Report: A Comprehensive Exploration of American History and Education

The 1776 Report is a comprehensive exploration of American history and education, examining the founding principles of the United States and their relevance to modern education. Authored by Larry Arnn, president of Hillsdale College, the report argues that American education has strayed from its original purpose of preparing students for self-government and has instead become focused on promoting social justice and political correctness.

The report begins by examining the founding principles of the United States, which Arnn argues are based on the principles of natural law and individual liberty. He then traces the history of American education, showing how it has evolved over time from a focus on classical education to a focus on progressive education and social justice.
